ALL-IN-ONE SOLUTION FOR ULTIMATE VIRTUAL
REALITY EXPERIENCE ON YOUR EVENT

Push the boundaries,
creating spectacular
event that leave a
lasting impression on
exhibitors and
attendees alike.

PROJECTION DOMES

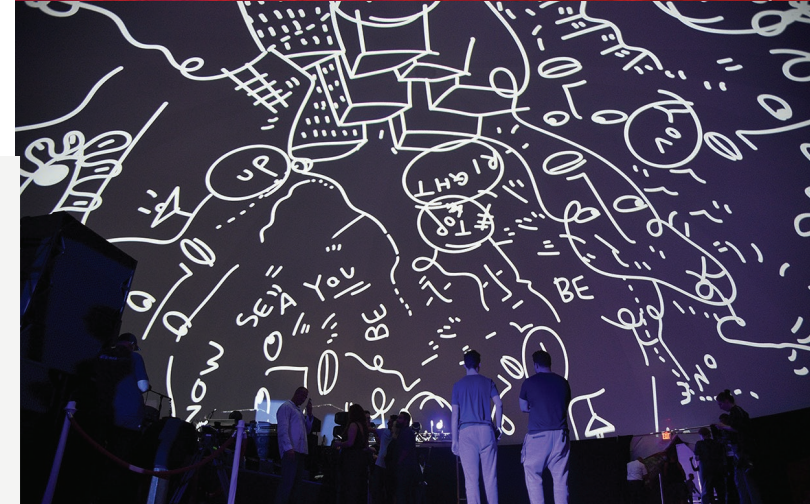

WHAT IS 360° PROJECTION DOME?

Spherical projections use the highest quality 4K projectors, displaying a 3D multimedia projection on an additional surface inside the dome. With this kind of projection on the inside of a geodesic tent, the viewer is literally thrown into another dimension. By using a special technology that combines the image from several projectors into one full display, the viewer is immersed in a space surrounding them from all sides.

You can own or hire any of them

We offer a full range of Polidomes projection spaces – from 6 to 30 meters in diameter, accommodating even more than 1000 people! You can own or hire any of them.

Spherical projections have a multitude of applications: they are used for concerts, theatrical performances, and video game events or mobile planetariums.
